Objective

A Final-year B.Tech student in Information Technology, equipped with hands-on expertise in full-stack development, machine learning, and AI integration. Proven ability to architect and ship real-world production-ready solutions that solve genuine problems at scale. Actively seeking a high-impact-role to engineer intelligent solutions, accelerate under world-class mentorship, and contribute to teams building the next generation of technology

Technical Skills

Languages: Python, Java, SQL

Web Development: HTML, CSS, JavaScript, Bootstrap

Frameworks & Libraries: Flask, Pandas

Tools & APIs: Git, VS Code, Google Sheets API, Google Gemini API

Databases: SQLite, MySQL

Internships & Trainings

- Full Stack Web Development Intern
GATEWAY SOFTWARE SOLUTIONS — Jun 2025 – Jul 2025
 - - Expertise in both front-end and back-end technologies
 - - Engineered and deployed full-stack web applications spanning frontend interfaces, backend logic, RESTful APIs, and relational database layers, adhering to production-grade development standards
 - - Collaborated on translating complex business requirements into scalable, maintainable software solutions across the complete software development lifecycle
- Artificial Intelligence & Machine Learning Intern
NXTLOGIC Software Solutions | Dec 2025 – Jan 2026
 - - Built and trained machine learning models using python, covering data preprocessing, feature engineering, model training, and evaluation.
 - - Improved model performance through feature selection and evaluation techniques on real-world datasets.
 - - Applied AI/ML concepts and data-driven approaches to solve practical business problems and support intelligent automation.

Projects

WalletIQ – AI-Powered Personal Financial Assistant

A full-stack web application for personal finance management with AI-driven budgeting guidance and real-time expense analytics.

Tech Stack: Python, Flask, SQLite, SQLAlchemy, HTML, CSS, JavaScript, Bootstrap, Google Gemini API

- Built a full-stack expense tracking system with category-wise management, transaction history, and an interactive real-time analytics dashboard
- Integrated Google Gemini API to power an AI financial advisor and natural-language chatbot for personalized budgeting recommendations

- Implemented secure user authentication (registration, login, session management) and modular MVC architecture for scalability
- Designed a responsive modern UI using Bootstrap and JavaScript with seamless front-to-back data flow via SQLAlchemy ORM

Symposium Event Management Website

Technologies: HTML, CSS, JavaScript, Python, Flask, SQLite/MySQL, Payment Gateway, Google Sheets API

- Architected a full-stack symposium management platform using Flask, SQLite, and JavaScript with secure authentication and integrated payment gateway
- Automated participant onboarding and data management via Google Sheets API, eliminating manual intervention for organizers
- Deployed a responsive, domain-hosted solution that processed 250+ registrations and served 400+ participants during a college-level symposium

SafeMap AI – AI-Powered Safety & Crime Intelligence Platform

A full-stack AI-powered geospatial web application that helps users assess location safety through interactive maps, crime analytics, and intelligent safety recommendations.

Tech Stack: React, Vite, Tailwind CSS, Leaflet, Node.js, Express.js, MongoDB Atlas, Python, FastAPI

- Developed a full-stack AI-powered safety mapping platform with interactive heatmaps, global location search, and AI-driven safety insights.
- Built a scalable MERN backend with JWT authentication, RBAC, geospatial APIs, RESTful services, and community crime reporting.
- Implemented FastAPI and Scikit-learn models for safety scoring, crime hotspot detection, and AI-generated location recommendations.

Certifications

- AWS Cloud Practitioner Essentials - AWS Training & Certification | July 2026
- Power BI Workshop – OfficeMaster, Oct 2025
- Python Classes & Objects Workshop – Mercy Technologies, Aug 2024
- UI/UX Design MasterClass – NoviTech R&D Pvt. Ltd., Sep 2025

Education

Bachelor of Technology - Information Technology

V.S.B College of Engineering Technical Campus, Coimbatore, Tamil Nadu

Sep 2023 – May 2027 (Expected)

CGPA: 7.62

Relevant Courses: Machine Learning, Data Structures & Algorithms, DBMS, Web Development

HSC | Palanigounder Higher Secondary School, Pollachi, Tamil Nadu

2021 – 2023 | 71%

Languages

- English (Fluent)
- Tamil (Native)
